

Hayden Paddon is New Zealand's most successful rally driver and has been driving for over 20 years. His key achievements have included multiple NZ titles, 1 WRC victory, 8 WRC podiums and over 40 WRC stage victories.

Throughout his career he has always had a methodical way of working, trying to find an advantage and improve in every possible way. The beauty of rallying is that the driver can make a big difference, and this can include not just driving, but pace notes and understanding of how to extract the most from the car you are driving.

## DRIVER TRAINING

Hayden is able to support drivers or teams anywhere in the world and can cater a support package that best suits your requirements. Hayden can help with:

- Career and goal planning
- Setting up your car
- Work with you to fine-tune/develop your car
- Pace note training (reading the road and writing)
- Driving techniques
- Work with you on test and development days

Packages can be tailored to suit your requirements, but some baseline packages can include:

### Hayden on-site at your test - \$2,500 + GST per day (plus all travel costs)

Hayden will join your team for the whole day testing. Hayden will drive your car, give feedback and help to fine tune setup. Help to develop your driving by analysing driving style (data and observing) and provide a test plan prior to the test of what recommendations to try (to be best prepared) This does not include Hayden being in passenger seat.

### Hayden and Paddon Rallysport at test - Starting from \$4,000 + GST per day (plus travel costs)

Hayden, along with one experienced PRG technician and one experienced PRG engineer, join you at a test. Over and above Hayden helping the driver, our technician and engineer can help directly on the car in terms of advice and changes if needed. Our engineer (specialising in Motec and Magneti Marelli) can also help fine tune the systems in the car and extract data for use of drivers and team.

### Pace note training - \$500 + GST per half day

Half a day training with Hayden for up to 2 people (driver and co-driver) at Paddon Rallysport HQ in Cromwell. Training would include going through onboard videos, discussing Hayden's system and breaking down your own system. A broad range of Central Otago back country roads to practice writing/developing pace notes. This would be great to develop what you already do, or to learn how to write pace notes.

Hayden can provide support and advice anywhere around the world using communications such as email, video calls, social media and is available at any time on phone or email for car set-up advice you may like

Full season or rally packages can be tailored to help a team in all areas throughout a season
